

22.5X11.75 LIGHTWEIGHT WHEELS

JANTSA proudly introduces a new lightweight generation of 22.5x11.75 wheels with 5.000 kg load capacity. Available in both ET 0 and ET 120 versions, these wheels embody optimized rim design, protected valve location, and high-grade steel. Already now our worldwide customers can benefit from lower fuel consumption with maximum payload of this new solution.
